

## BOOKS RECEIVED

The following additional books of some interest to *Minos* readers were received or acquired by T.G. Palaima, the book review editor of *Minos*, at the Program in Aegean Scripts and Prehistory (PASP), Department of Classics, 1 University Station C3400, University of Texas at Austin, Austin, TX 78712-0308 USA. Any readers of *Minos* interested in reviewing books for the next number of *Minos* should contact him directly by mail or, preferably, electronically via fax or internet:

fax: 512 471-4111  
internet: tpalaima@mail.utexas.edu.

*Minos* invites suggestions from scholars about other books they would like to review or think should be reviewed within the areas of chief concern to the *Minos* readership. Please be guided, but not constrained, by the books reviewed and articles published in the most recent numbers of *Minos*.

In general we would like to present informed and honest criticism about any published work relevant to Aegean linguistics, scripts and textual interpretation and the necessary archaeological/historical contexts and comparanda for such scholarship. We need your cooperation to make this review section a truly international endeavor. Notation with an asterisk (\*) means that the volume has already been assigned and should —Διὸς νεύοντος— appear in a forthcoming number of *Minos*.
