Regular Issue, vol. 5, n. 4 (2016)

SCOPE

The Advances in Distributed Computing and Artificial Intelligence Journal (ADCAIJ) is an open access journal that publishes articles which contribute new results associated with distributed computing and artificial intelligence, and their application in different areas.

The artificial intelligence is changing our society. Its application in distributed environments, such as the Internet, electronic commerce, mobile communications, wireless devices, distributed computing and so on, is increasing and becoming an element of high added value and economic potential in industry and research. These technologies are changing constantly as a result of the large research and technical effort being undertaken in both universities and businesses. The exchange of ideas between scientists and technicians from both academic and business areas is essential to facilitate the development of systems that meet the demands of today's society.

We would like to thank all the contributing authors for their hard and highly valuable work. Their work has helped to contribute to the success of this special issue. Finally, the Editors wish to thank Scientific Committee of Advances in Distributed Computing and Artificial Intelligence Journal for the collaboration of this special issue, that notably contributes to improve the quality of the journal. We hope the reader will share our joy and find this special issue very useful.

INDEX

Real Time Analytics for Characterizing the Computer User's State by Davide Carneiro, Daniel Araújo, André Pimenta, Paulo Novais	Page 1
Relationships between Specified and Underspecified Quantification by the Theory of Acyclic Recursion by Roussanka Loukanova	Page 19
Hash-chain-based authentication for IoT by Antonio Pinto, Ricardo Costa	Page 43
Simulating heterogeneous user behaviors to interact with conversational interfaces by David Griol, José Manuel Molina	Page 59
Planning large systems with MDPs: case study of inland waterways supervision by Guillaume Desquesnes, Guillaume Lozenguez, Arnaud Doniec, Éric Duviella	Page 71
Adding real data to detect emotions by means of smart resource artifacts in MAS by Jaime Rincon, Jose Luis Poza, Juan Luis Posadas, Vicente Julián, Carlos Carrascosa	Page 85
Prototyping low-cost and flexible vehicle diagnostic systems by Marisol García Valls	Page 93
